IMPACT PLAYER

Dec 2021

Jenson Samuel
Mumbai

Jenson is an excellent resource who handles the criticalities with complete expertise in front-end technology. From his initial days into the drug testing product, he owns the comprehensive responsibility of all deliveries He has been an amazing technical expert and an influential leader who mentored the team members to establish a highly productive team within a short span of time. His initiative and team leading capability has brought the project onto track swiftly and team have delivered Drug Testing MVP right on-time. Jenson did a fantastic job this quarter and is indeed an Impact player. Congratulations Jenson on your hard work and resilience!

Bharathwaj Ramesh
Chennai

Bharath joined the AFL project recently and has helped in streamlining the QA process for AFL Azure migration and the Products as well. He could quickly jump-in and guide the team, get the QA plan and work towards it. He is always available and ready to help being a good motivator for the QA team. Bharath's presence made the difference and reflected in closing the functional testing for all 22 applications on-time. Congratulations Bharath on the excellent work!

Mohanaraman Subramanian
Chennai

Mohan is perfect in the Release coordination with Zero Error. He has ensured the Client Modules Delivery which are very critical for the business and regulatory reporting. Regulatory Reporting Consumer requirement are very immediate requirement & critical in nature. As a release coordinator he has ensured the playbook review meeting & the artefact checkpoints with the team in a proper manner, creating RFC Ticket with correct coordination over the Pre-Prod & Prod Deployment for a successful release. Mohan has successfully done 8+ Releases & have a strong impactful delivery for the entire team. Mohan's involvement in the Business perspective have a strong impact on the team performance. Congratulations on winning the deserving title!

Babli Sandbhor
Mumbai

Babli is one of the key team players for BNYM - RDH BAU Team. She has strong technical knowledge and has helped the team accomplish key deliverables in short duration of time. She has learned RDH application very well and supports other team members by sharing her knowledge. Clients have appreciated her work multiple times. Her attitude and flexibility towards work is worth mentioning. She is an Impactful player in the team. Keep up the good work!!

Balakrishnan Ethiraju
Chennai

Bala is one and only one Azure DevOps specialist on whom both FA and Orion trust for smooth and timely release of Monthly production codebase and HF releases. He sets the guidelines and directs the FA along with his team on what is right . DevOps pipelines are set in FA environment by Bala and is running for past 2 years in the way it is required to be. He is prompt and innovative. In last quarter he has started contributing to Orion on a wider perspective especially in training the IT team with DevOps practices. Congratulations Bala in winning the title!

Beena Bhaskaran
Chennai

Beena recently joined the team and has quickly established herself as a valuable contributor to the Fiserv Optis testing project.. Her commitment and contributions are outstanding ,recently she provided support until late at night to finish the APR testing on time, which was appreciated by the client. She also discovered defects during APR testing and promptly informed to the customer. Beena was instrumental in coaching and mentoring the new hires on application . Within three months, she completed application-related training and earned over 100 hours of learning credits. Congratulations on creating the Impact Beena !

Deepak Rane
Mumbai

Deepak has always been a valuable member of the Grange team. He has created an excellent relationship with the customer and has outstanding ties with the client SME's. He along with the new team took KT from other vendors and clients, and the team is now working on commercial lines application independently. He gave extra effort to learn the Power BI tool and utilized it to create the PL and CL stat reports. He also designed the Mytool box, which integrates all the applications onto a single page, eliminating the need for developers to manage over 50 applications URLs separately. For his efforts, he was appreciated by both the customer and the management team. His contributions to project and organization is worth mentioning. Kudos on winning the title

Vignesh Ravi
Coimbatore

Vignesh was allocated to Inventory Audit POC project as a Tech Lead to work on React and .NET technologies. With no prior experience with React framework and PWA, he took this as a challenge and self-learned the frameworks while working on IOApp project. Vignesh was very handy throughout the POC execution as he was not only working on his tasks but also guiding other team members on regular basis. IOApp POC was executed by borrowing resources from Serbia, which apparently did not go well for various reasons. Despite of that, Vignesh single handedly ensured the timely delivery of the project. We were able to deliver the application because of Vignesh's extra efforts. Congratulations and Thank you Vignesh for your excellent contributions to the project and team!

Satyanarayana Katamreddy
Chennai

Satya is an asset to the Fiserv Optics testing project. He maintains a positive relationship with the customer and delivered all tasks on time. He is an excellent mentor who handhold the team on domain, application, and technical aspects which empowered them to operate independently in a short period of time. He discovered several defects and promptly reported to the business. He received multiple appreciations from the customer for his excellent job. Within 2 months, he finished application-related training and earned 100+ hours of learning credits which is exceptional. Keep up the excellent work Satya .

Ashokkumar Vellaisamy
Coimbatore

Ashok has shown excellent technology expertise in leading the Drug Testing v4 product team. He played the key role in Azure environment setup and DevOps initiative. He also trained newly onboarded resources in understanding the product architecture. His commitment, dedication and hard work makes him a valuable contributor of the team. Congratulations Ashok, keep up the excellent work !
